

## Memorandum of Understanding (MoU)

### ***for following the TerraCert model: training, recognition and micro-credentials for the green transition***

This Memorandum of Understanding is a declaration of interest addressed to all individuals and organisations wishing to be recognised as **followers** of the model developed by the Erasmus+ project TerraCert for Certification and Micro-credentials in Regenerative Agriculture.

It is open to a wide range of stakeholders, including educational institutions, VET providers, Universities, experts, researchers, employers, policy makers, educators, students' representatives, social and civic organisations, trade unions and public administrations.

#### **1. Purpose**

By joining this MoU, the signatory expresses its interest in following the TerraCert approach and in showing support for its mission to:

- Promote flexible and inclusive training pathways based on short learning units.
- Contribute to the development of micro-credentials as tools for skills recognition and employability.
- Encourage digital innovation in education, especially through systems aligned with the Europass Digital Credentials Infrastructure.
- Foster sustainability and innovation in training, particularly in the field of Regenerative Agriculture and related sectors.

#### **2. What it means to be a TerraCert Follower**

As a TerraCert follower, the signatory:

- Recognises the value of the TerraCert model and its contribution to green, inclusive, and innovative education in Europe.
- Supports its vision, without any obligation to adopt or implement its tools or activities.
- Wishes to stay informed about the development and outcomes of the project.

This Memorandum is a declaration of interest only. It does not entail any legal, financial, or operational commitment.

#### **3. A growing ecosystem of cooperation**

The TerraCert project aims to contribute to the creation of a European ecosystem of actors, linked directly or indirectly to the agricultural sector and/or the rural environment as a whole, committed to the connection between training and employment, through learning pathways with digital recognition based on open microcredentials.

The community of TerraCert *followers* reflects this vision by bringing together diverse actors from the educational, professional, social and institutional sectors to support a shared goal: building accessible, high-quality and future-oriented skills systems.

#### **4. How to join**

To become a recognised TerraCert follower, please complete the online form available at the following [link](#).

Upon submission, your organisation or personal profile will be included in the public list of TerraCert Followers and will receive updates on the project and its results.

Thank you for supporting the TerraCert model and for contributing to a European learning ecosystem based on openness, collaboration, and innovation.
